

H(app)iness is ShakeRecycles

Shaker now recycles more than ever...and it is easier than ever to do so.

With a mobile app, **ShakeRecycles**, and a new online tool, collection and recycling are a no brainer. Seriously. Ready to get started?

Download the **ShakeRecycles** app to your Apple or Android device. Once it is loaded and you have entered your address, you can access your Collection Calendar, which includes upcoming recycling events, and Waste Wizard, a new tool designed to take the guesswork out of recycling. Type in any item you want to recycle and get exact instructions about how to do so. But, wait, there's more! With automatic notifications turned on, you will receive a reminder about your collection day or an upcoming recycling event. Go ahead, give the app a try!

Also, the Collection Calendar, recycling events, and Waste Wizard can be accessed on your computer from shakeronline.com. Click on **ShakeRecycles**.

We think it will make you happy.

SHAKER HEIGHTS

Happiness is Single-Stream Recycling

**Go ahead and commingle...
the recyclables, that is.**

**Gone are the days of dividing
recyclables into different buckets.**

Now you can place household paper, metal cans, glass and plastic containers together in the five-gallon buckets provided by the Public Works Department.*

No need to separate anything and do not bag your recyclables in plastic bags. Once collected, the commingled recyclables are sent to a local Material Recovery Facility where they are sorted, processed, baled, and sold.

**Up to four buckets are provided free of charge by calling 216-491-1490. At this time, the five-gallon round buckets are the most compatible with our scooters.*

Happiness is Expanded Capacity for Recyclables

In response to the growth in recycling, the City has purchased new garbage loaders with greater capacity for recyclables. Now the loaders are split to carry 60 percent garbage and 40 percent recyclables, **more than double the previous capacity for recyclables.** As recycling grows, the amount of space for recyclables in the loader can also grow.

Scooter capacity has also changed. Retrofitted scooter compartments are now split 50/50 between garbage and recycling. The separate compartments are then emptied into the appropriate compartment on the loader. Like the loader, adjustments to the split can be made on the scooters as needed.

Recycling is an ever-changing business. Please visit shakeronline.com/departments/public-works for all the latest information or call 216-491-1490. Most changes begin January 1, 2016.
